

JASC

Each summer, nearly 80 students from universities across Japan and the United States convene to discuss some of the hottest topics facing the two nations. The program alternates host countries each year giving students the rare opportunity to see places, whether at home or abroad, and learn about their culture through the eyes of others.

From politics to pop culture and everything in between, JASC offers motivated university students of all levels an outlet for ambition, intellect, and cultural stimulation.

Not only do conference participants learn about one of the world's most strategic bilateral alliances, they also have the opportunity to directly help reinforce the bonds between countries by sharing knowledge and experiences while making memories and friendships with other future leaders.

For information about the Japan side of the Conference including Japanese student applications, please visit our partner's website: [JASC-Japan](#).
